

Northern Virginia Laser Training is Virginia's first and only state-approved school for laser aesthetics. This 40 credit hour program focuses on laser hair removal, IPL, photorejuvenation, vein reduction, laser resurfacing, microdermabrasion and the list continues to grow.

By keeping our class sizes smaller than our national competitors, we are able to provide an abundance of hands-on training. We are also proud to offer continued support via email and telephone even after you graduate. All students will leave with a truly authentic certificate with the Virginia state and our corporate seal. All manuals provided contain everything covered in class as well as templates and business information for medispas and other laser based businesses.

Call us today and see why we are one of the fastest growing schools in the nation.
